1. Install centos from a cd - (centos - 6.2)

2. chrome set up -
http://www.if-not-true-then-false.com/2013/install-chromium-on-centos-red-hat-rhel/
worked and tested.

3. jdk setup (java and javac setup)
tested by typing java -version and javac -vesion
java download -
http://www.oracle.com/technetwork/java/javase/downloads/jdk7-downloads-1880260.html
installation -
http://www.if-not-true-then-false.com/2013/install-chromium-on-centos-red-hat-rhel/
Following till 4a makes it work.

4. Follow the link for cloudera manual installation
Just do all the installation in root only for poc work except for steps suggested as hdfs user.
Also use $USER to create directories in hdfs . Tested it fine by deploying a job from root user.
